## GENERAL ELECTION 2024

### WHAT GREENS WILL DO FOR YOU

#### PROTECT THE SERVICES WE DEPEND ON

- Protect the **NHS** from privatisation - we must never move to a system that depends on your ability to pay. We must properly fund the NHS including fair wages for all staff
- Make polluting **water companies** financially responsible for cleaning up their mess and bring utilities under public control
- Build more genuinely **affordable housing** by ensuring all new developments prioritise this and converting existing buildings
- Properly **insulate** all private and council accommodation to cut carbon and your bills
- Give renters more stability by freezing rent immediately and banning no-fault evictions
- Make it easier and cheaper for you to get around on **public transport** with more buses where you need them and £1 singles across the country

We'll be honest. There's no way to **increase public services** without increasing public spending, but we won't raise taxes on working people. We will fund these vital programmes through an emergency **tax on the richest 1%** and the biggest polluters. Want to learn more? Go to [greenparty.org.uk/about/our-manifesto](https://greenparty.org.uk/about/our-manifesto)

Duncan and Elliott organized a litter pick in Stamshaw

### REAL HOPE, REAL CHANGE

#### ELECTION PROVIDES OPPORTUNITY

It's likely the next government will be formed by Labour, but rather than seizing the opportunity to reverse **14 years of Tory mismanagement**, Starmer will do the bare minimum.

A Greener turnout will make a Labour government braver and **more ambitious**. After the Greens got a million votes in 2015, Labour adopted various parts of our manifesto. Sending Greens to Westminster will show the bigger parties Britain wants **real change** and a fairer society.

### MEET ELLIOTT LEE

#### CANDIDATE FOR PORTSMOUTH SOUTH

Elliott currently works to support human trafficking victims and has spent years working and volunteering in social care, schools, care homes, and learning disability charities. He knows just how much underfunding our vital services is destroying them.

He says: *"Traditional politics has failed to address pressing issues, like the climate crisis. We can't afford to play it safe. I want more for our country. I know I can do that for Portsmouth South."*
